You do not currently have a privacy policy in place and should seek to have this remedied as soon as possible.

You should seek to install a data protection officer as soon as possible.

Your staff are not aware of their responsibilities in regard to data privacy. We suggest that your privacy policy should be included in your employee hand book while training should be provided as a part of the orientation process. You should also consider providing regular updates, in time with any changes to company policy.

Data Governance

Due to the location of your customers, it is likely that you are not currently compliant with legislation pertaining to data privacy. We can help you to achieve compliance while aiding in your business efficiency, security and reputation.

It is important to provide work station health and safety checks for all of your employees. Not only is it a legal obligation but can also serve to improve productivity and increase employee engagement.

You appear to be missing documentation for at least some of your software applications. This may cause downtime, reduce productivity and prove to be a hindrance during staff training.

Your staff are not aware of their responsibilities in regard to data privacy. We suggest that your privacy policy should be included in your employee hand book while training should be provided as a part of the orientation process. You should also consider providing regular updates, in time with any changes to company policy.

Software

You should seek to install a data protection officer as soon as possible.

Some of your software seems to be lacking an up to date license agreement. Remember it is a legal requirement to keep all of your software properly licensed.

You don't appear to have support for some or all of your bespoke software. This could cause prolonged down time or even result in a complete systems failure.

You do not currently hold a copy of the code for your bespoke applications. This means that should you ever wish to tweak or enhance an application, you will be unable to do so.

Bespoke Software

You do not rely on any third party dependencies. This is great news as it means you are fully in control of all aspects of your system.
